IN | OUT

**Designed for
surfers, swimmers
and other water
athletes, SurfEars™
protect your ears
without affecting
hearing and
balance.**

SURF|EARS™

- Measuring close to zero acoustic loss, SurfEars™ are by far the most sound translucent plugs on the market.
- With SurfEars™ you can easily keep a normal conversation and hear what's going on around you without feeling isolated.
- Blocking out water, cold air, dirt & bacteria, SurfEars™ help prevent ear inflammation (swimmer's ear) and abnormal bone growth in the ear canal (surfer's ear).
- Cleverly designed with changeable parts, SurfEars™ allow you to customise the plugs to fit perfectly in your ears.
- The fixation wings keep SurfEars™ in place even during extreme activities and heavy wipeouts.
- SurfEars™ let so much sound through its easy to forget you're wearing ear protection!

SUPERIOR PROTECTION FOR WATER ATHLETES

- We decided to leave ear infections and medical conditions like surfer's ear behind.
- SurfEars® protects your ears from water, cold air, dirt & bacteria while maximising hearing and balance.
- SurfEars® let's so much sound through it's easy to forget you're wearing ear protection.

PROVEN PERFORMANCE

- Independent tests show that SurfEars® have far superior performance compared to similar products on the market. SurfEars® show close to zero acoustic loss in the frequency range of human speech while the best competitor cuts away about 20-30dB.
- To give you a reference, 30dB is roughly the difference between the loudest and lowest volume setting on your smartphone.
- That's a pretty big difference in performance!

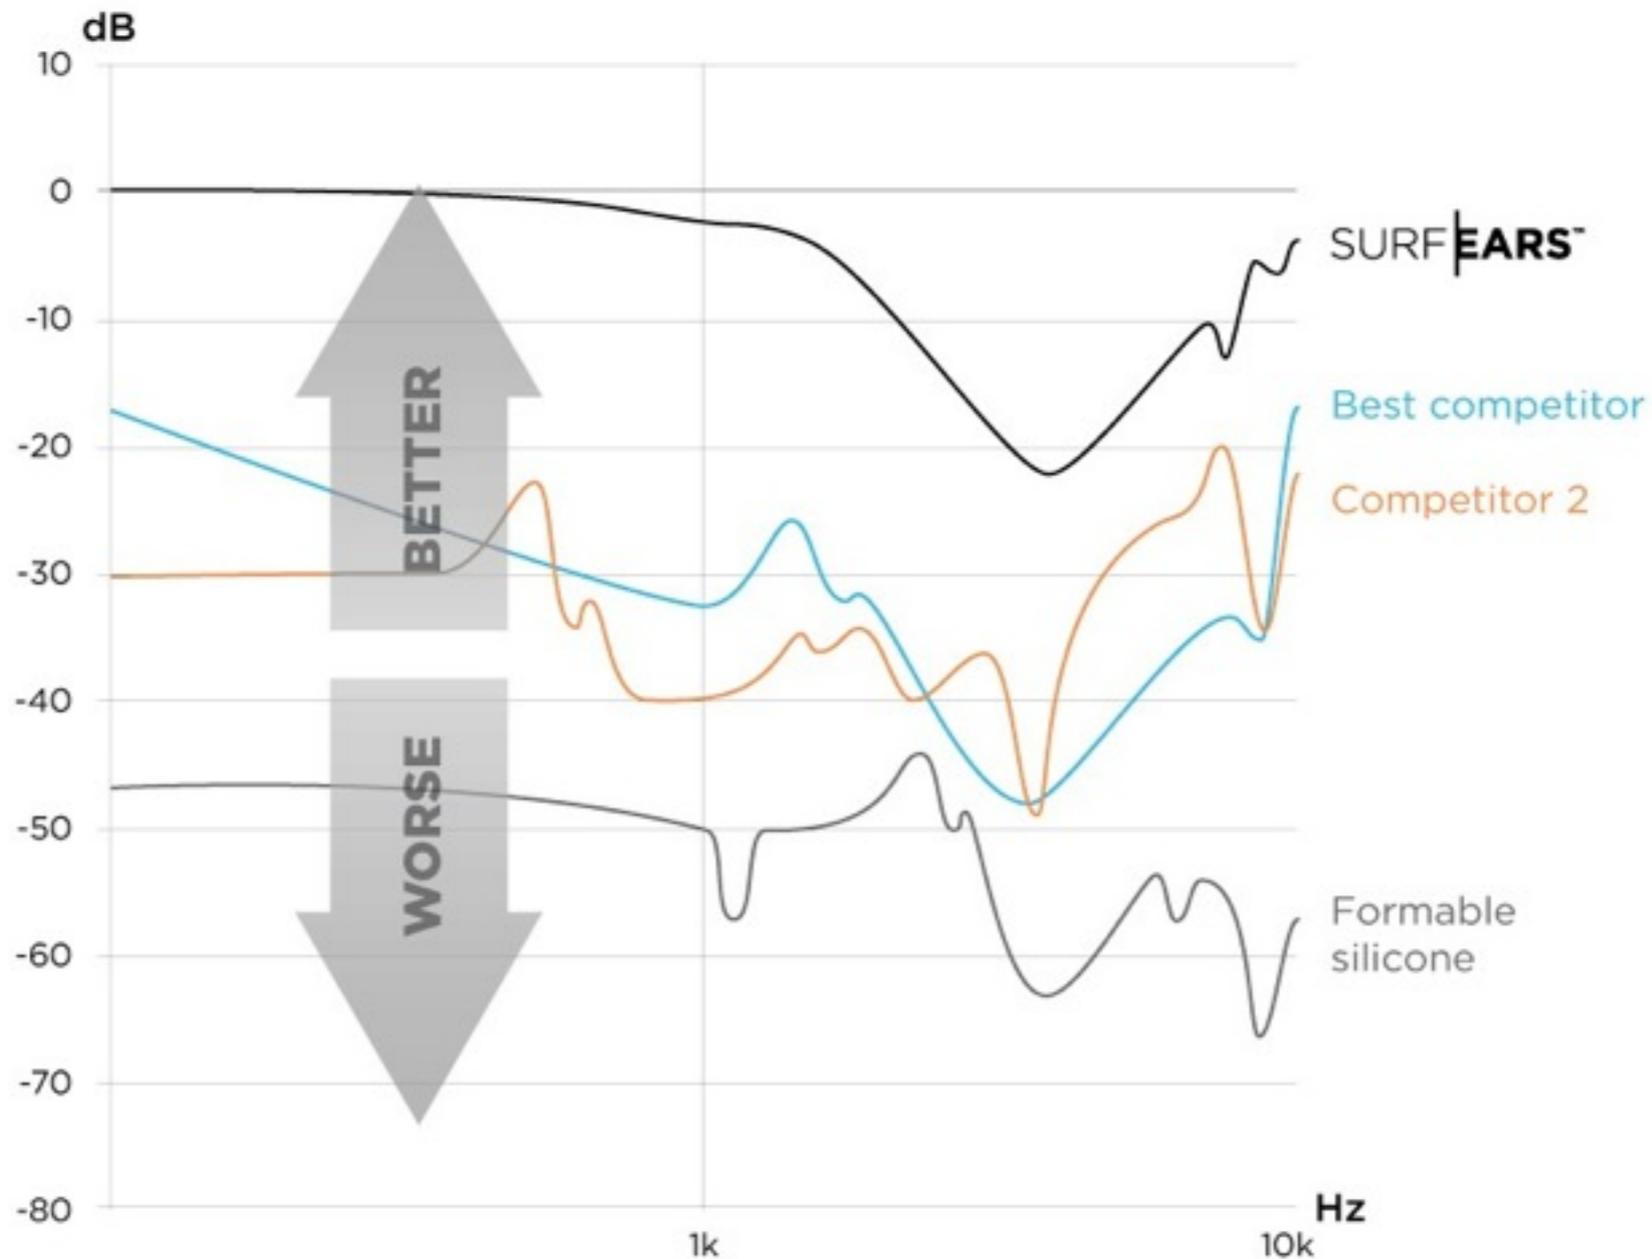

Chart: Sound loss as function of frequency

HOW IT WORKS
